AM832 Anesthesia Machine

Your Reliable Choice for Safety and Efficient

Key Features:

- Large 10.4" LCD color touchscreen
- 4-tubes of flowmeters for 2-gas sources and suitable for various operation requirement.
(Optional:6-tubes of flowmeters for 3-gas sources)

Advanced Monitoring System :

- Real-time multiple-parameters monitoring (FiO2,Vt,MV,Pressure etc.).
High-precision sensor for getting accurate data.

Safety Assurance:

- Automatic alarm system, convenient for monitoring the equipment at real-time .
- Backup battery could keep the continuous operation of the anesthesia machine.

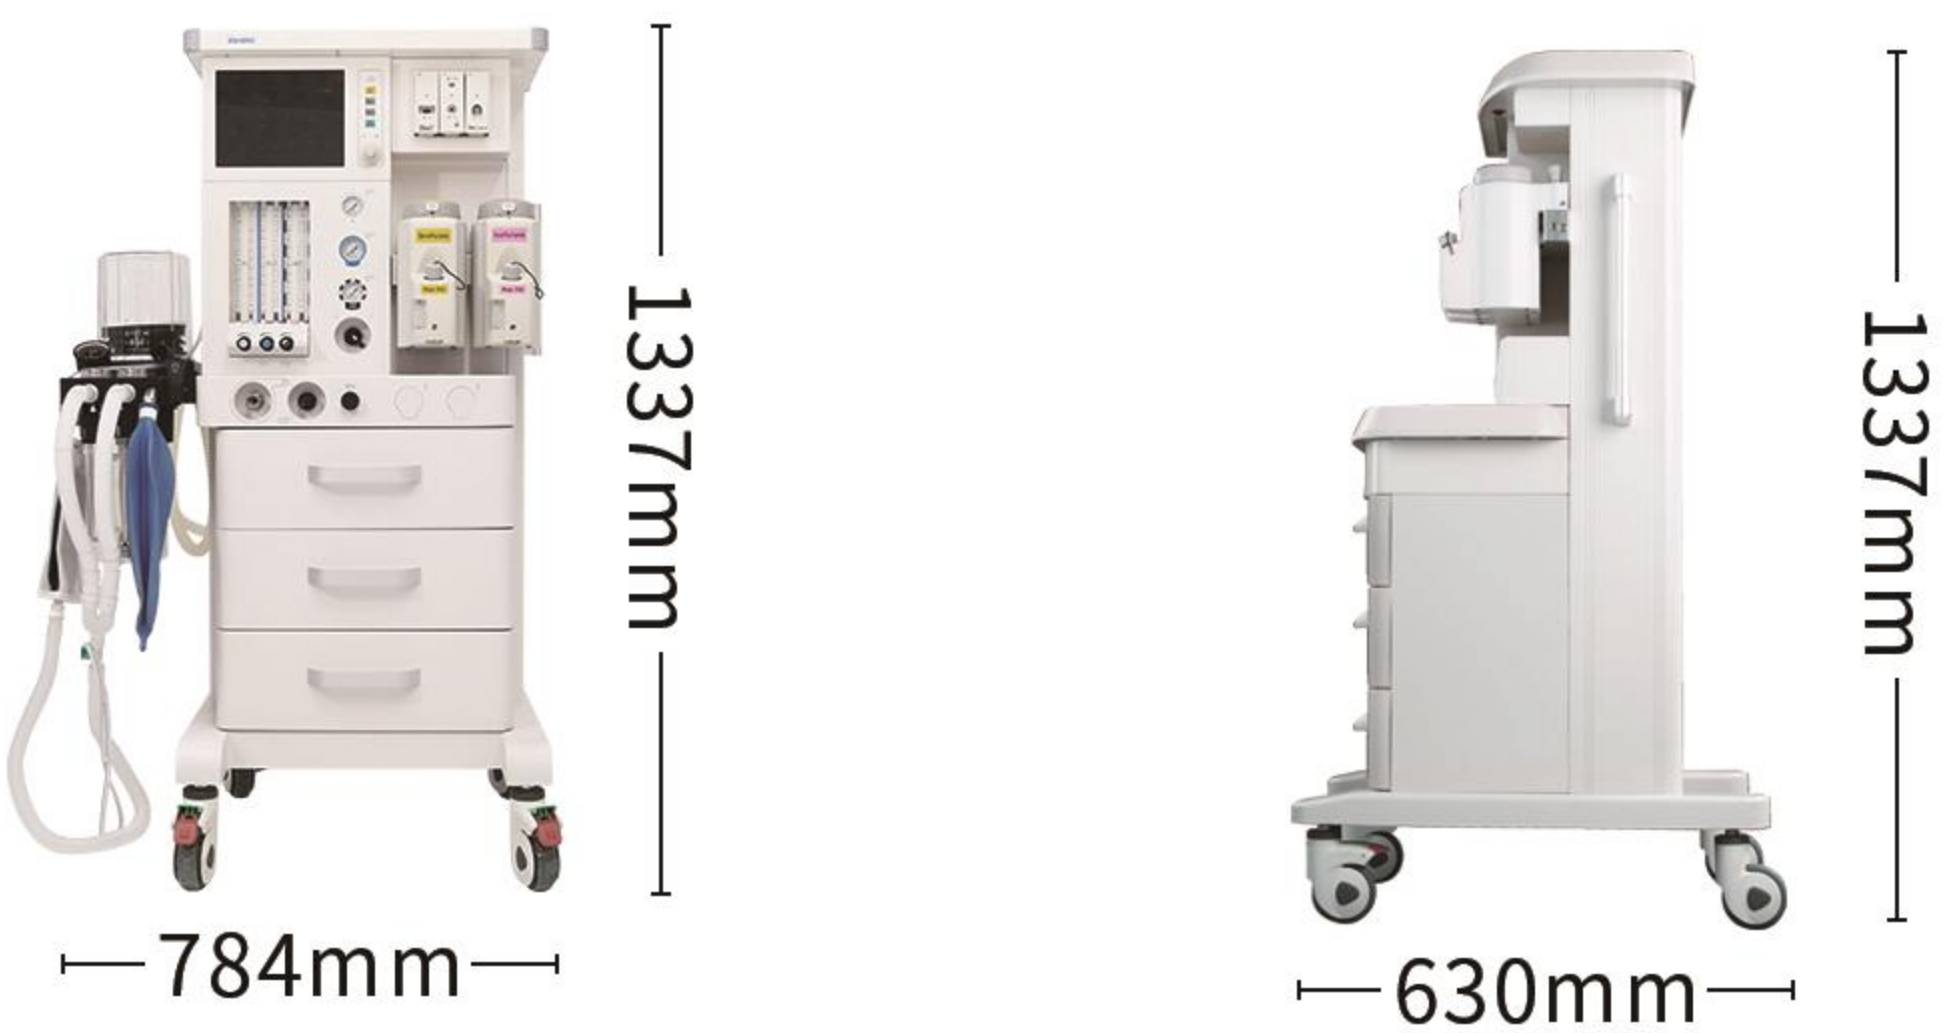

Optional Functions :

- Optional modules: Main-stream or Side-stream CO2 Module, SpO2 Module, Negative Pressure Suction, Main-stream or Side-stream AG Module etc.

Excellent Ventilation Mode :

- Multiple ventilation modes (VCV,PCV,MAN,optional SIMV-P,SIMV-V,PSV)
- Display three waveforms in simultaneously, easy for understanding the ventilation status of patient in Intuitively .

Selecting the medical equipment with safety, reliability and functionality are paramount .
